L.R. Boeck et al., Flame propagation across an obstacle: OH-PLIF and 2-D simulations with detailed chemistry, Proc. Combust. Inst. 36, 2016

The schlieren sequence used to generate the flame tip velocity plot, Fig. ??, shot 11, is shown. Every fourth image of the original sequence is presented.

Fig. S1: Schlieren sequence, test 11. Time difference between frames is $53.3 \mu\text{s}$.
